## WORK EXPERIENCE

### WPOOL, Dhaka, Bangladesh — *Software Engineer* *Remote*

August 2023 - Present

Work area:

Projects:

- [FlexSync - Shopify App](#)
  - Built a bi-directional real-time sync solution between Shopify and Google Sheets.
  - Developed using Laravel, MySQL, React, and the Shopify GraphQL API.
  - Implemented background tasks with Redis queues to handle product export, and optimized Google Sheets updates by batching webhook data into a buffer table.
  - Played a full-stack role, handling backend processes, front-end integration, and platform-specific tasks.
  - Trained and familiarized the team with the Shopify platform.
- [Clippy - Screen Recorder Chrome Extension](#) (Failed Project)
  - Developed a screen recording extension using FilamentPHP for the backend.
  - Integrated Cloudflare Stream and Cloudflare Worker for video storage and cloud management.
  - Built features for recording, storing, and sharing video links, but faced challenges in deployment and scaling.
  - Contributed as a full-stack developer handling the entire lifecycle of the project.

### MoveOn, Dhaka, Bangladesh — *Software Engineer*

NOVEMBER 2021 - July 2023

Work area:

- Built and ship high-quality features on [Ali2BD](#), [MoveOn](#)
  - Sync bulk order data with third-party order items
